

Become a Neuroscientist

“It is a privilege to be able to work as a scientist. To investigate important questions that will have an impact on society and make a difference to the lives of others is what drives me.”

Professor Linda Richards
Professor of Neuroscience
and Deputy Director, QBI

“When many students think of a career in science it conjures up images of white coats and laboratories.

Neuroscience is so much more than that. It’s about discovery and making small leaps of insights that find results.”

Annalisa Paolino
PhD student at QBI
